Dear Ms. Tuck:

Attached are updated maps from our meeting with you and Minister Ramsay last week. The maps now reflect additions to protect representative ecosystems and area removed by the Ontario Parks Board from their earlier proposal. One map summarizes the AFA recommendation and the second map compares it to the Parks Board map. The AFA recommendation agrees with 70% of the area proposed by the Parks Board. The main difference between the two recommendations is less forested area for protection in the AFA proposal. This is to ensure a sustainable wood supply for those mills we discussed.

The following table summarizes the area where forestry would not take place in Algonquin Park using the same methodology as the Parks Board.

	Area Where Forestry Does Not Occur (hectares)	Percent of Total Park Area
Current status	331,020	43%
Parks Board Recommendation	409,482	54%
AFA Recommendation	374,126	49%

If you have any questions regarding the above information, or if I can be of further assistance, please feel free to contact me.

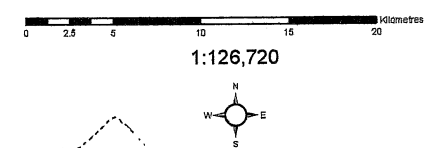

Yours truly,

Carl Corbett, R.P.F.
General Manager

Stuart & Ray,

Sorry on the delay for these numbers. The attached spreadsheet shows changes to protected area for AFA recommendation and does not include the Parks Board component 5. My letter to Jennifer Tuck is a summary that does include component 5.

Maps provided to Jennifer Tuck and digital information are on AFA site that Kevin Houf can access and retrieve data.

All the best for the holidays.

Carl
